#### DICHIARAZIONE DI PRESTAZIONE

#### DoP 0242

per fissaggio prolungato fischer FUR (Fissaggio plastico per l'utilizzo in calcestruzzo e muratura)

1. Codice di identificazione unico del prodotto-tipo: DoP 0242 2. Usi previsti: Ancoraggio plastico per utilizzo multiplo in calcestruzzo e muratura per applicazioni non strutturali (categoria d'uso a, b, c):, vedi appendice, in particolare gli allegati da B1 - B4. fischerwerke GmbH & Co. KG, Klaus-Fischer-Str. 1, 72178 Waldachtal, Germany 3. Fabbricante: 4. Mandatario: 5. Sistemi di VVCP: 2+ ETAG 020, 2012-03, usato come EAD 6. Documento per la valutazione europea: Valutazione tecnica europea: ETA-13/0235; 2021-03-12 ETA-Danmark A/S Organismo di valutazione tecnica: Organismi notificati: 2873 TU Darmstadt 7. Prestazioni dichiarate: Resistenza meccanica e stabilità (BWR 1) Resistenza alla rottura dell'acciaio sotto azione di trazione: Allegato C1 Resistenza alla rottura dell'acciaio o del polimero sotto azione di taglio: Allegato C1 Resistenza alla rottura per estrazione o del calcestruzzo oppure rottura del polimero sotto azione di trazione (Gruppo materiale di base a): Allegato C1 Resistenza per qualsiasi direzione di carico senza braccio di leva (Gruppo materiale di base b e c): Allegato C2 Distanza dal bordo e interasse (Gruppo materiale di base a): Allegato B2 Distanza dal bordo e interasse (Gruppo materiale di base b e c): Allegato B3 Spostamenti con carichi a breve e a lungo termine: Allegato C1 Durabilità: Allegati A3, B1 Sicurezza in caso di incendio (BWR 2) Reazione al fuoco: Classe A1 Resistenza al fuoco: Allegato C1

8. Documentazione tecnica appropriata e/o documentazione tecnica specifica:

La prestazione del prodotto sopra identificato è conforme all'insieme delle prestazioni dichiarate. La presente dichiarazione di prestazione è emessa, in conformità al regolamento (UE) n. 305/2011, sotto la sola responsabilità del fabbricante sopra identificato.

Firmato a nome e per conto del fabbricante da:

Dr.-Ing. Oliver Geibig, Direttore Generale Unità di Business & Engineering Tumlingen, 2021-03-26

Jürgen Grün, Direttore Generale Chimica & Qualità

Questa Dichiarazione di Prestazione (DoP) è stata preparata in varie lingue. In caso di contestazioni sull'interpretazione, prevarrà sempre la versione inglese.

L'Appendice include informazioni volontarie e complementari in lingua inglese che superano i requisiti di legge (lingua specificata in modo neutrale).

# II SPECIFIC PART OF THE EUROPEAN TECHNICAL ASSESSMENT

# 1 Technical description of product and intended use

#### Technical description of the product

Fischer FUR 10 is a plastic anchor consisting of a plastic sleeve made of polyamide and an accompanying specific screw of galvanised steel or galvanized steel with an additional Duplex-coating or of stainless steel.

The plastic sleeve is expanded by screwing in the specific screw which presses the sleeve against the wall of the drilled hole.

The installed anchor is shown in Annex 1

# 2 Specification of the intended use in accordance with the applicable EAD

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchors of at least 50 years.

The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works. 3 Performance of the product and references to the methods used for its assessment

#### 3.1 Mechanical resistance and stability (BWR 1)

The essential characteristics regarding mechanical resistance and stability are included under the Basic Works Requirement Safety in use

### **3.2** Safety in case of fire (BWR 2)

Reaction to fire Anchorages satisfy requirements for Class A 1 Resistance to fire See Annex C 1

#### **3.3 Safety and accessibility (BWR 4)**

Characteristic resistance for tension and shear loads, see Annexes C 1, C 2

Characteristic resistance for bending moments, see Annex C 1

Displacements under shear and tension loads, see Annex C 1

Anchor distances and dimensions of members, see Annex B 2 and B3.

# **3.4 General aspects**

The verification of durability is part of testing the essential characteristics.

Durability is only ensured if the specifications of intended use according to Annex B are taken into account.

# 4 Attestation and verification of constancy of performance (AVCP)

# 4.1 AVCP system

In accordance with guideline for European technical approval ETAG 020, March 2012 used as European Assessment Document (EAD) according to Article 66 Paragraph 3 of Regulation (EU) No 305/2011 the applicable European legal act is: 97/463/EC. The system to be applied is 2+.

# **Intended Use**

Fixing in concrete and different kinds of masonry

# Legend

$\mathbf{h}_{\mathrm{nom}}$	=	overall	plastic a	anchor	embedment	depth	in the	base	material
-----------------------------	---	---------	-----------	--------	-----------	-------	--------	------	----------

- $h_1$  = depth of drill hole to deepest point
- h = thickness of member (wall)
- $t_{fix} \quad = \quad thickness \ of \ fixture \ and \ / \ or \ non-load \ bearing \ layer$

Annex A 1

Product description Installed anchor

Appendix 4 / 12

Table A3.1: Dimensions [mm]									
Anchor type			Special screw [mm]						
	h <sub>nom</sub>	Ø d <sub>nom</sub>	t <sub>fix</sub>	l <sub>d</sub>	$l_{\rm Sf}^{2)}$		Ø d <sub>s</sub>	l <sub>G</sub>	ls
<b>FUR 10</b>	70	10	≥1	71-360	2,2	18,5	7,0	≥ 77	$\geq$ <b>78</b> <sup>1)</sup>

1) To ensure that the screw penetrates the anchor sleeve,  $l_s$  must be  $l_d + l_{Sf}{}^2 + 7 \mbox{ mm}$ 

2) Only valid for flat collar version

#### Table A3.2: Materials

Name	Material
Anchor sleeve	Polyamide, PA6, colour grey
	- Steel gvz A2G or A2F acc. to EN ISO 4042:2001
Special screw	$\frac{\textbf{or}}{\textbf{or}}$ - Steel gvz A2G or A2F acc. to EN ISO 4042:2001+ Duplex-coating type Delta-Seal in three layers (total layer thickness $\geq 6 \mu\text{m}$ )
	or         - Stainless steel acc. to EN 10 088-3:2014, e.g. 1.4401, 1.4571, 1.4578, 1.4362         or         - Stainless steel R of corrosion resistance class CRC III according to EN 1993-1-4:2015

# fischer long shaft fixing FUR

Annex A 3

**Product description** Dimension / Materials

Appendix 6 / 12

# Specifications of intended use

#### Anchorages subject to:

- Static and quasi-static loads.
- Multiple fixing of non-structural applications.

#### **Base materials:**

- Reinforced or unreinforced normal weight concrete with strength classes ≥ C12/15 (use category "a"), according to EN 206-1:2000, Annex C1.
- Solid brick masonry (use category "b"), according to Annex C2. Note: The characteristic resistance is also valid for larger brick sizes and higher compressive strengths of the masonry unit.
- Hollow brick masonry (use category "c"), according to Annex C2.
- Mortar strength class of the masonry  $\geq$  M2,5 according to EN 998-2:2010.
- For other base materials of the use categories "a", "b" or "c" the characteristic resistance of the anchor may be determined by job site tests according to ETAG 020, Annex B, Edition March 2012.

#### **Temperature Range:**

#### **FUR 10**

- c: 20 °C to 50 °C (max. short term temperature + 50 °C and max long term temperature + 30 °C)
- b: 20 °C to 80 °C (max. short term temperature + 80 °C and max long term temperature + 50 °C)

#### Use conditions (Environmental conditions):

- Structures subject to dry internal conditions (zinc coated steel, stainless steel).
- The specific screw made of galvanised steel or galvanised steel with an additional Duplex-coating may also be used in structures subject to external atmospheric exposure, if the area of the head of the screw is protected against moisture and driving rain after mounting of the fixing unit in this way, that intrusion of moisture into the anchor shaft is prevented. Therefore there shall be an external cladding or a ventilated rainscreen mounted in front of the head of the screw and the head of the screw itself shall be coated with a soft plastic, permanently elastic bitumen-oil-combination coating (e.g. undercoating or body cavity protection for cars).
- Structures subject to external atmospheric exposure (including industrial and marine environment) and to permanently damp internal condition, if no particular aggressive conditions exist (stainless steel). Note: Particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor swimming pools or atmosphere with extreme chemical pollution (e.g. in desulphurization plants or road tunnels where de-icing materials are used).

#### Design:

- The anchorages are to be designed in accordance with the ETAG 020, Annex C under the responsibility of an engineer experienced in anchorages and masonry work.
- Verifiable calculation notes and drawings shall be prepared taking account of the loads to be anchored, the nature and strength of the base materials and the dimensions of the anchorage members as well as of the relevant tolerances. The position of the anchor is indicated on the design drawings.
- Fasteners are only to be used for multiple use for non-structural application, according to ETAG 020, Edition March 2012.

Installation:

- Hole drilling by the drilling method according to Annex C1 and C2 for use categories "b" and "c".
- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site.
- Installation temperature FUR 10: 20 °C to + 40 °C
- Exposure to UV due to solar radiation of the not protected anchor  $\leq 6$  weeks.

FUR 10: In case a fixing point consists of more than 1 anchor with spacing of  $s \le s_{cr,N}$ , this fixing point is considered as a group with a max. characteristic resistance  $N_{Rk,p}$  acc. to Table 6.

For  $s > s_{cr,N}$ , the anchors are always considered as single anchors, each with a characteristic resistance N<sub>Rk,p</sub> acc. to Table 6.

#### Installation Instructions (the following pictures show fixing through timber parts)

1. Drill the bore hole acc. to Table B1.1 using the drill method described in the corresponding Annex C.

2. Remove dust from borehole (masonry and concrete).

3. Insert anchor (screw and plug) by using a hammer until the collar of the plastic sleeve is flush with the surface of the fixture.

4. The screw is screwed-in until the head of the screw touches the sleeve. The anchor is correctly mounted, when the head of the screw fits tight on the surface and cannot be screwed-in any further.

5. Correctly installed anchor in hollow masonry.

6. Correctly installed anchor in concrete.
