

**UNICA CREMONE WITH KEY**
**01151**
**Applications**

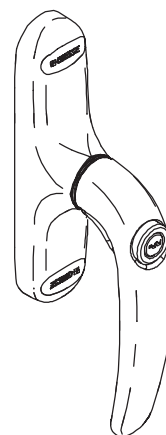

Two-handed Cremone with key for central gasket and sliding systems. Handle rotation to 90 and 180 degrees, opening and closing positioning notch.

**Finishes**

Painted in RAL 9010, RAL 1013 and RAL 9005

**Package**

Box containing 50 pieces.

**Technical characteristics**

The use of quality die-cast materials and the GIESSE painting system ensure good mechanical quality, uniformity of colour and good resistance to abrasion.

The UNICA Cremone with key is two-handed and has a centre-to-centre of 104 mm.

To be used in conjunction with the following special closing kits for the type required: Inward opening, Outward opening, Tilt and Turn and Sliding opening.

UNICA is supplied without internal components. These components, included in the customisation kit are easy and quick to install. This operation is done by the installer.

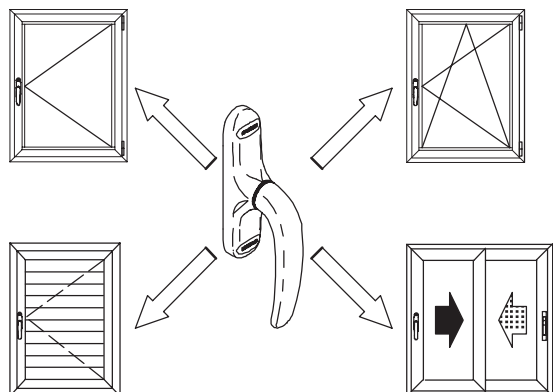

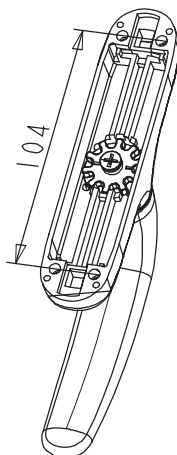

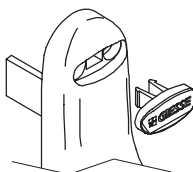

The kits for use in conjunction with the Unica consist of Cremone internal components and those required for the fastener.

**Parts supplied**

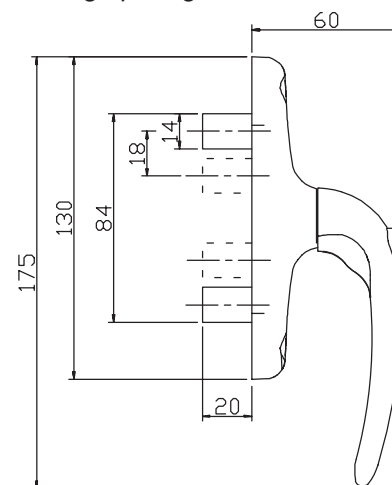

2 hole-covering plugs

**Materials**

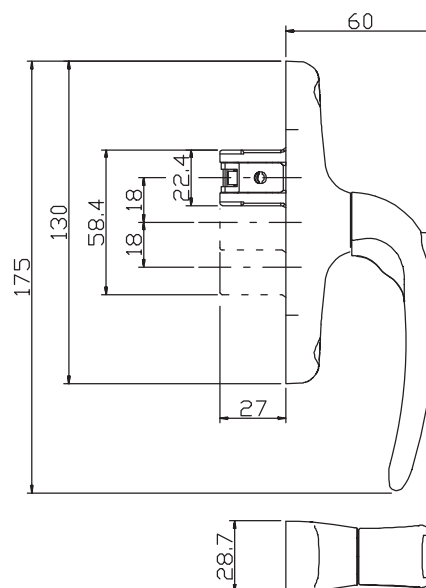

- Die-cast aluminium handle
- Die-cast Zamak mechanism and gearwheel
- Steel spring
- Galvanised steel screw
- Hostaform washer

With inward, outward and sliding opening kit:
