FINITURA PVD AGGIUNTIVA : APPLICABILE AD OGNI FINITURA.
IL PVD è UN TRATTAMENTO GALVANICO AD ALTA RESISTENZA PER MANTENERE LA FINITURA NEL TEMPO INVARIATA.

ADDITIONAL PVD FINISH: APPLICABLE TO ANY FINISH. PVD IS A HIGH RESISTANCE GALVANIC TREATMENT TO KEEP THE FINISH UNCHANGED OVER TIME.

Diamo futuro a materiali carichi di storia

Le Fabric dà la possibilità di customizzare i prodotti che produce sia in tema di materiali (**ottone, bronzo, ferro, rame e acciaio inox**) sia nella scelta della finitura e colore in base al proprio gusto.

Le maniglie fra infinite ispirazioni e personalizzazioni

Ogni elemento rende unico non solo la maniglia, il maniglione o il pomolo realizzato da Le Fabric, ma anche la porta, la finestra o il mobile al quale sono destinati. dal linguaggio *industrial*, moderno, lineare e dallo stile vintage è scaturita l'ispirazione per una collezione che fonde memoria e rigore espressivo con bellezza e concretezza.

le maniglie *custom* possono essere realizzate in ferro, ottone, bronzo, peltro, rame e acciaio inox: materiali che, grazie alle caratteristiche di fusione, donano un aspetto unico e inimitabile a ogni singola maniglia.

A material is not a limit, but an infinite inspiration

Le Fabric gives you the possibility to customise our products according to your taste, both in terms of materials (brass, bronze, iron and stainless steel) and in the choice of finishes and colours.

The brilliance of brass

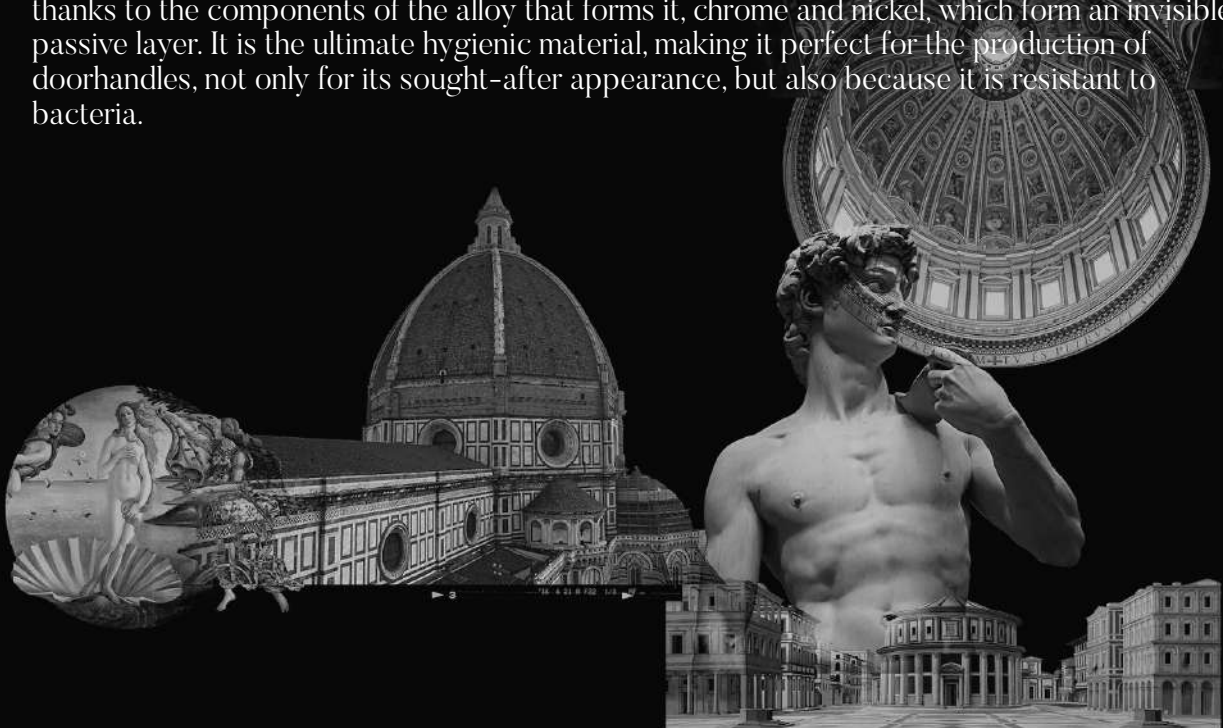

Say the word **brass**, and you think of doorhandles. Its malleability and ductility, combined with its resilience, have found it success in many areas, from the production of coins to that of sought-after accessories for furniture, doors and windows. It is also a material that, above all, “sounds good”, and for this reason it is used for the production of instruments such as trumpets and saxofones, which are known as brass instruments.

The charme of bronze

Bronze is a noble metal, used for creating valuable objects and pieces of art. Starting from **red bronze** and **white bronze**, it is possible to obtain different finishes that give this material diverse appearances, varying from natural bronze, to imperial green and antiqued bronze. What all of these finishes have in common is their level of resistance, including those exposed to external agents, and a fascinating quality that only increases over time.

The resistance of stainless steel

Stainless steel is a durable material, resistant to corrosion, acid and abrasion. It does not rust, thanks to the components of the alloy that forms it, chrome and nickel, which form an invisible, passive layer. It is the ultimate hygienic material, making it perfect for the production of doorhandles, not only for its sought-after appearance, but also because it is resistant to bacteria.

Every project is a challenge we face with enthusiasm, consulting with architects and designers, committing ourselves to furthering the project and making it the centrepiece of our next production.

Ogni progetto è una sfida che accogliamo con entusiasmo e che rilanciamo ad architetti e designer, impegnandoci a promuoverne i progetti e a renderli protagonisti delle nostre prossime pubblicazioni.
